A. SUPPORTING DATA. Data reviewed for JD (check all that apply - checked items shall be included in case file and, where checked and requested, appropriately reference sources below):

- Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: "116 West Moore Street, Sumter, South Carolina / TMS # 2290502002" and dated June 13, 2017
 Data sheets prepared/submitted by or on behalf of the applicant/consultant.
 Office concurs with data sheets/delineation report.
 Office does not concur with data sheets/delineation report.
 Data sheets prepared by the Corps:
 U.S. Geological Survey Hydrologic Atlas:
 USGS NHD data.
 USGS 8 and 12 digit HUC maps. 03040205_03
 U.S. Geological Survey map(s). Cite scale & quad name: (Sumter East) The quad map does not depict any wetlands and or other waters of the United States on the subject property.
 USDA Natural Resources Conservation Service Soil Survey. Citation: Pg. 70, Rains Sandy Loam, 100% hydric inclusions.
 National wetlands inventory map(s). Cite name: (U11) Uplands
 State/Local wetland inventory map(s):
 FEMA/FIRM maps:
 100-year Floodplain Elevation is: (National Geodetic Vertical Datum of 1929)
 Photographs: Aerial (Name & Date): 99:11204:98, SCDNR 2006
 or Other (Name & Date):
 Previous determination(s). File no. and date of response letter:
 Applicable/supporting case law:
 Applicable/supporting scientific literature:
 Other information (please specify):

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: A desktop review was completed on June 13, 2017. All of the necessary resources were

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

used to make the proper determination. The aerial photography, soil survey information, National Wetlands Inventory, and topographic maps were reviewed to assist in making the proper determination. The soils map depicts the site consisting of a Rains Sandy Loam soil, with 100% hydric inclusions. The National Wetlands Inventory map depicts the site as being (U11) Uplands. The topographic map does not depict any wetlands and or other water of the United States on the subject site. In addition, the subject property is a developed lot within a single-family residential subdivision. With all of the information gathered, and the use of the proper resources it was determined that the site consist entirely of uplands and does not contain any wetlands and or other waters of the United States.
