B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

This project area consists of 0.22 acres along the shoulder and in the right-of-way of Lewis Place in Dillon County, SC. USGS topographic survey information depicts a cleared area that is void of blue line features or wetland symbols. The project area is comprised of the non-hydric soil Fuquay sand and the partially hydric soil Clarendon loamy sand. NWI maps depict the project area as upland cropland/pasture. Based on the combination of the above listed resources and previous determination SAC-2009-00627, the project area was determined to be void of aquatic resources.
