¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:

This form addresses a 20.76 acre undeveloped lot southeast of the City of Conway. The site lacks any indicators of hydrology during a period of average rainfall. The entire 20.76 acre area is comprised of uplands with sandy soils with uncoated sand grains consistent with non-hydric soils. The vegetation onsite consists of hydrophytic vegetation typical of the area. Additionally, no other potentially jurisdictional features are present.

This site is assessed on a single basis form.
