REGULATORY DIVISION

Refer to: P/N #SAC 2007-2504-11W(REVISED)

8 AUGUST 2008

Pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403), Sections 401 and 404 of the Clean Water Act (33 U.S.C. 1344), and the South Carolina Coastal Zone Management Act (48-39-10 et seq.) a revised application has been submitted to the Department of the Army and the S.C. Department of Health and Environmental Control by

**THE SOUTH CAROLINA DEPARTMENT OF PARKS RECREATION & TOURISM
c/o COASTAL SCIENCE & ENGINEERING (CSE)
POST OFFICE BOX 8056
COLUMBIA, SOUTH CAROLINA 29202-8056**

for a permit to perform beach nourishment using sand from an accreting area adjacent to and in waters of the

ATLANTIC OCEAN

at locations along the shoreline of Hunting Island State Park on Hunting Island, Beaufort County, South Carolina (Latitude 32.3714°, Longitude 80.4367°)

The proposed work consists of excavating sand from an accreting area at the south end of Hunting Island and transporting the material using land based equipment to critically eroded oceanfront areas. **PLEASE NOTE: The entire project was advertised on November 23, 2007, and revised on January 4, 2008, to delete the north spit as a borrow site. In detail, the project is now being revised to include the following changes:**

To change the overall scope of the project to reduce the volume of sand from 400,000 to 300,000 cubic yards to be accomplished in several smaller scale projects as needed over the life of the issued permit and to enlarge the south spit borrow area from approximately 8 acres to approximately 30 acres and limit the depth of excavation to no more than 3 feet. According to the applicant, the initial nourishment will involve removing no more than 150,000 cubic yards of sand from the borrow site. At this time, the borrow site does not contain 300,000 cubic yards of sand. That total volume will only be used if the borrow site rebuilds after the initial nourishment event. The purpose of this revision to the proposed work is to allow for shallower excavation and avoid the creation of deep holes at the borrow site.

8 AUGUST 2008

NOTE: Revised plans depicting the work described in this notice are available on the U.S. Army Corps of Engineers website at www.sac.usace.army.mil and will be also be provided, upon receipt of a written request, to anyone that is interested in obtaining a copy of the plans for the specific project. The request must identify the project of interest by public notice number and a self-addressed stamped envelope must also be provided for mailing the drawings to you. Your request for drawings should be addressed to the
