LIST OF FIGURES	iv
LIST OF TABLES	v
1. PROJECT DESCRIPTION	1-1
1.1 Project Background	1-1
1.2 Project Purpose.....	1-1
1.3 Project Objectives	1-1
1.4 Description of Project Area.....	1-2
1.5 Experimental Design	1-3
1.6 Report Organization	1-3
2. FIELD SAMPLING PROGRAM.....	2-1
2.1 Sampling Objectives	2-1
2.2 Sampling Locations.....	2-1
2.3 Vibracoring Procedures.....	2-1
2.4 Reference Sediment Collection.....	2-3
2.5 Site Water Collection	2-4
2.6 Equipment Decontamination.....	2-4
2.7 Equipment Blanks	2-5
2.8 Sample Labeling and Chain-of-Custody	2-5
3. TOXICITY TESTING PROGRAM.....	3-1
3.1 Introduction	3-1
3.2 Materials and Methods	3-1
3.2.1 Sample Receipt and Homogenization	3-1
3.2.2 Water Column Testing	3-2
3.2.2.1 Acute Toxicity Testing with <i>Mysidopsis bahia</i>	3-2
3.2.2.2 Acute Toxicity Testing with <i>Menidia beryllina</i>	3-3
3.2.2.3 Acute Toxicity Testing with <i>Arbacia punctulata</i>	3-3
3.2.3 Solid Phase Testing	3-4
3.2.3.1 Solid Phase Testing with <i>Mysidopsis bahia</i>	3-4
3.2.3.2 Solid Phase Testing with <i>Leptocheirus plumulosus</i>	3-5

CONTENTS (Continued)

	<u>Page</u>
3.2.4 Bioaccumulation Testing.....	3-5
3.2.4.1 <i>Neanthes virens</i> Bioaccumulation Testing.....	3-6
3.2.4.2 <i>Macoma nasuta</i> Bioaccumulation Testing.....	3-6
3.2.5 Statistics	3-7
3.2.6 Reference Toxicant Testing.....	3-7
3.3 Results.....	3-8
3.3.1 Water Column Testing with <i>Mysidopsis bahia</i>	3-8
3.3.2 Water Column Testing with <i>Menidia beryllina</i>	3-8
3.3.3 Water Column Testing with <i>Arbacia punctulata</i>	3-9
3.3.4 Solid Phase Testing with <i>Mysidopsis bahia</i>	3-9
3.3.5 Solid Phase Testing with <i>Leptocheirus plumulosus</i>	3-10
3.3.6 Bioaccumulation Testing with <i>Neanthes virens</i>	3-11
3.3.7 Bioaccumulation Testing with <i>Macoma nasuta</i>	3-11
3.3.8 Reference Toxicant Results.....	3-11
3.4 Discussion	3-12
4. BULK SEDIMENT TESTING PROGRAM.....	4-1
4.1 Materials and Methods.....	4-1
4.1.1 Sample Receipt and Homogenization	4-1
4.1.2 Analytical Methods and Detection Limits.....	4-1
4.1.3 Data Analysis	4-2
4.2 Bulk Sediment Results	4-2
4.2.1 Metals/Others	4-2
4.2.2 Pesticides.....	4-3
4.2.3 PCBs.....	4-3
4.2.4 Polynuclear Aromatic Hydrocarbons	4-3
4.2.5 Dioxins and Furans.....	4-4
4.3 Rinsate Blank Results.....	4-4
4.3.1 Metals/Others	4-4
4.3.2 Pesticides.....	4-4
4.3.3 PCBs.....	4-4
4.3.4 Polynuclear Aromatic Hydrocarbons	4-5

CONTENTS (Continued)

	<u>Page</u>
4.3.5 Dioxins and Furans.....	4-5
4.4 Discussion	4-5
5. BIOACCUMULATION TESTING PROGRAM	5-1
5.1 Materials and Methods	5-1
5.1.1 Tissue Preparation and Homogenization.....	5-1
5.1.2 Analytical Methods and Detection Limits.....	5-1
5.2 Bioaccumulation Results.....	5-1
5.2.1 Theoretical Bioaccumulation Potential	5-1
5.2.2 Tissue Analysis.....	5-3
5.2.2.1 Tissue Concentrations– <i>Neanthes virens</i>	5-3
5.2.2.2 Tissue Concentrations– <i>Macoma nasuta</i>	5-5
5.3 Discussion	5-7
6. SUMMARY AND CONCLUSIONS.....	6-1
6.1 Introduction	6-1
6.2 Bulk Sediment Chemistry	6-1
6.3 Toxicity Testing	6-2
6.4 Bioaccumulation Studies.....	6-2
6.5 Conclusions	6-4

ATTACHMENT 5-3 TISSUE ANALYSIS–CERTIFICATE OF ANALYSIS FOR GLASSWARE

LIST OF FIGURES

<u>Number</u>	<u>Title</u>
1-1	Daniel Island location map.
2-1	Sampling station locations in the Cooper and Wando Rivers.
2-2	Reference station locations in the vicinity of the CODMDS.
4-1	Comparison of mean trace metal concentrations (mg/kg) detected in sediment cores from four reaches in the vicinity of the proposed Daniel Island Marine Terminal.
4-2	Comparison of mean Total Organic Carbon (TOC) concentrations (mg/kg) in sediment cores from four reaches in the vicinity of the proposed Daniel Island Marine Terminal.
4-3	Comparison of mean grain size distribution for sediment cores from four project reaches and the reference site for the proposed Daniel Island Marine Terminal.

LIST OF TABLES

<u>Number</u>	<u>Title</u>
2-1	Summary of vibracoring station information.
2-2	Summary of reference station information.
3-1	Summary of sample collection and receipt data for Daniel Island project.
3-2	Results of 96-hour water column toxicity tests with <i>Mysidopsis bahia</i> , Daniel Island project.
3-3	Mean (\pm standard deviation) of water quality parameters measured in <i>Mysidopsis bahia</i> water column toxicity testing for Daniel Island project.
3-4	Results of 96-hour water column toxicity tests with <i>Menidia beryllina</i> , Daniel Island project.
3-5	Mean (\pm standard deviation) of water quality parameters measured in <i>Menidia beryllina</i> water column toxicity testing for Daniel Island project.
3-6	Results of 48-hour larval development tests with <i>Arbacia punctulata</i> , Daniel Island project.
3-7	Mean (\pm standard deviation) of water quality parameters measured in <i>Arbacia punctulata</i> water column toxicity testing for Daniel Island project.
3-8	Results of whole sediment tests with <i>Mysidopsis bahia</i> , Daniel Island project.
3-9	Mean (\pm standard deviation) of water quality parameters measured in overlying water during <i>Mysidopsis bahia</i> toxicity testing for Daniel Island project.
3-10	Results of 10-day whole sediment toxicity tests with <i>Leptocheirus plumulosus</i> , Daniel Island project.
3-11	Mean (\pm standard deviation) of water quality parameters measured in overlying water during <i>Leptocheirus plumulosus</i> toxicity testing for Daniel Island project.
3-12	Results of grain size ^(a) analyses, Daniel Island project.
3-13	Results of 28-day whole-sediment bioaccumulation study with <i>Neanthes virens</i> , Daniel Island project.

LIST OF TABLES (Continued)

- 3-14 Mean (\pm standard deviation) of water quality parameters measured in overlying water during *Neanthes virens* bioaccumulation testing for Daniel Island project.
- 3-15 Results of 28-day whole-sediment bioaccumulation study with *Macoma nasuta*, Daniel Island project.
- 3-16 Mean (\pm standard deviation) of water quality parameters measured in overlying water during *Macoma nasuta* toxicity testing for Daniel Island project.
- 3-17 Results of reference toxicant testing for Daniel Island project.
- 3-18 Summary of results of water column and whole sediment testing performed on sediment samples from Daniel Island project.
- 4-1 Analytical methods for sediment, tissue, and rinsate analyses.
- 4-2 Method detection limits (MDLs) for sediment samples.
- 4-3 Method detection limits (MDLs) for rinsate blanks.
- 4-4 Laboratory organic analysis data qualifiers.
- 4-5 Laboratory inorganic analysis data qualifiers.
- 4-6 Results of bulk chemistry analysis for Daniel Island Marine Terminal: Metals/others.
- 4-7 Percent difference: Metals exceeding the reference concentration.
- 4-8 Results of bulk chemistry analysis for Daniel Island Marine Terminal: Pesticides.
- 4-9 Percent difference: Pesticides exceeding reference concentrations.
- 4-10 Results of bulk chemistry analysis for Daniel Island Marine Terminal: PCB congeners.
- 4-11 Percent difference: PCB congeners exceeding the reference concentration.
- 4-12 Results of bulk chemistry analysis for Daniel Island Marine Terminal: Polynuclear aromatic hydrocarbons.
- 4-13 Percent difference: PAHs exceeding reference concentrations.

LIST OF TABLES (Continued)

- 4-14 Results of bulk chemistry analysis for Daniel Island Marine Cargo Terminal: Dioxins and furans.
- 4-15 Percent difference: Dioxins and furans exceeding reference concentration.
- 4-16 Results of rinsate analysis for Daniel Island Marine Terminal: Metals/others.
- 4-17 Results of rinsate analysis for Daniel Island Marine Terminal: Pesticides.
- 4-18 Results of rinsate analysis for Daniel Island Marine Terminal: PCB congeners.
- 4-19 Results of rinsate analysis for Daniel Island Marine Terminal: Polynuclear aromatic hydrocarbons.
- 4-20 Results of rinsate analysis for Daniel Island Marine Terminal: Dioxins and furans.
- 4-21 Summary of analytes exceeding reference sediment values: Daniel Island Marine Terminal.
- 5-1 Method detection limits (MDLs) for tissue samples.
- 5-2 Theoretical bioaccumulation potential for pesticides in tissue.
- 5-3 Theoretical bioaccumulation potential for PCBs in tissue.
- 5-4 Theoretical bioaccumulation potential for PAHs in tissue.
- 5-5 Theoretical bioaccumulation potential for dioxins and furans in tissue.
- 5-6 U.S. Food and Drug Administration action levels for chemical compounds in fish and shellfish for human consumption^(a).
- 5-7 Percent lipids analysis for Daniel Island Marine Terminal: *Neanthes virens*.
- 5-8 Results of tissue analysis for Daniel Island Marine Terminal: Metals *Neanthes virens*.
- 5-9 Percent difference for tissue exceeding the reference concentration: Metals *Neanthes virens*.
- 5-10 Results of tissue analysis for Daniel Island Marine Terminal: Pesticides *Neanthes virens*.

LIST OF TABLES (Continued)

- 5-11 Results of tissue analysis for Daniel Island Marine Terminal: PCB congeners *Neanthes virens*.
- 5-12 Percent difference for tissue exceeding the reference concentration PCB congeners *Neanthes virens*.
- 5-13 Results of tissue analysis for Daniel Island Marine Terminal: Polynuclear aromatic hydrocarbons *Neanthes virens*.
- 5-14 Percent difference for tissue exceeding reference concentrations: Polynuclear aromatic hydrocarbons *Neanthes virens*.
- 5-15 Results of tissue analysis for Daniel Island Marine Cargo Terminal: Dioxins and furans *Neanthes virens*.
- 5-16 Percent difference for tissue exceeding reference concentration: Dioxins and furans *Neanthes virens*.
- 5-17 Percent lipids analysis for Daniel Island Marine Terminal: *Macoma nasuta*.
- 5-18 Results of tissue analysis for Daniel Island Marine Terminal: Metals *Macoma nasuta*.
- 5-19 Percent difference for tissue exceeding the reference concentration: Metals *Macoma nasuta*.
- 5-20 Results of tissue analysis for Daniel Island Marine Terminal: Pesticides *Macoma nasuta*.
- 5-21 Percent difference for tissue exceeding reference concentrations: Pesticides *Macoma nasuta*.
- 5-22 Results of tissue analysis for Daniel Island Marine Terminal: PCB congeners *Macoma nasuta*.
- 5-23 Percent difference for tissue exceeding the reference concentration: PCB congeners *Macoma nasuta*.
- 5-24 Results of tissue analysis for Daniel Island Marine Terminal: Polynuclear aromatic hydrocarbons *Macoma nasuta*.
- 5-25 Percent difference for tissue exceeding reference concentrations: Polynuclear aromatic hydrocarbons *Macoma nasuta*.

LIST OF TABLES (Continued)

- 5-26 Results of tissue analysis for Daniel Island Marine Cargo Terminal: Dioxins and furans *Macoma nasuta*.
- 5-27 Percent difference for tissue exceeding reference concentration: Dioxins and furans *Macoma nasuta*.
- 5-28 Summary of analytes exceeding reference tissue values: Daniel Island Marine Cargo Terminal *Neathes virens*.
- 5-29 Summary of analytes exceeding reference tissue values: Daniel Island Marine Cargo Terminal *Macoma nasuta*.
- 6-1 Analytes exceeding reference sediment values summarized by project reach: Daniel Island Marine Cargo Terminal.
- 6-2 Summary of results of water column and whole sediment testing performed on sediment samples from Daniel Island project.
- 6-3 Analytes exceeding reference tissue values summarized by project reach: *Neanthes virens*.
- 6-4 Analytes exceeding reference tissue value summarized by project reach: *Macoma nasuta*.
