

# Charleston District - Corps of Engineers Regulatory Branch Wetland Delineation Consultant List

January 19, 1996 Edition  
Revised: Addendum added & 803 Area Codes changed to 843 - June 3, 1998

## Part 1. Alphabetical Listing of Consultants.

This is a listing of consultants who have worked with this office in delineating wetland areas, or who have indicated that they are available for this type of work and requested that they be placed on this list. *Be aware that this should not be considered an endorsement of any listed consultant.* This office is willing to work with any and all qualified environmental consultants in efforts to delineate wetland areas. Part 2 of this list provides regionalized information for various areas within the state of South Carolina.

## **Part 2. Regional List**

This list is based on records of wetland delineations submitted to this office over roughly the past two years (since January 1994). When many people ask for information about consultants to do wetland delineations for them, they often want to know who works in their particular area of the state. As a result, this list has been revised to reflect that type of information. Some consultants specialize in a particular region, and others work statewide. The fact that a particular consultant is not listed for a given region does not mean they are not available to work in that area - it is certain that most, if not all, are available for work anywhere in the state. This simply reflects what our records show for submittals in the recent past. Some have indicated that they have recently worked on projects in other regions within South Carolina besides those for which they are listed, but these delineations were not submitted to this office for verification. As a result, these projects are not part of the database which was used to generate this list. *Be aware that this should not be considered an endorsement of any listed consultant.* This office is willing to work with any and all qualified environmental consultants in efforts to delineate wetland areas.

This list shows the names of the ten regions and lists the counties included in each region (based on the Regional Council of Government - or COG - boundaries). Below each is a list of the consulting firms who have done recent work in that area and have coordinated their work with this office for verification.

## ADDENDUM - June 2, 1998

Since the publication of this list, a number of consulting firms have expressed an interest in being placed on this list. This list has not been completely revised in the year and a half since its publication because it has been anticipated that a National Wetland Delineator Certification Program would be put into effect. That has not yet come to pass, and rather than totally revise the list which requires a substantial investment of time, this addendum page has been added.

As stated at the beginning of this list:

***Be aware that this should not be considered an endorsement of any listed consultant. This office is willing to work with any and all qualified environmental consultants in efforts to delineate wetland areas.***

If a consultant indicates to you that the fact that their name appears on this list implies some certification, endorsement or other approval of their firm by the Charleston District Corps of Engineers, they are misrepresenting the facts. This is a listing of consultants who have indicated that they are available for this type of work and requested that they be placed on this list.

The listing in this addendum is in alphabetical order.
