**Columbia, South Carolina 29201**

REGULATORY DIVISION  
Refer to: P/N # 2004-1N-081-C

9 April 2004

Pursuant to Sections 401 and 404 of the Clean Water Act (33 U.S.C. 1344), and the South Carolina Coastal Zone Management Act (48-39-10 et seq.) an application has been submitted to the Department of the Army and the S.C. Department of Health and Environmental Control by

**CAROLINA PARK ASSOCIATES &**  
**CDM OF CHARLESTON, LLC**  
**C/O NEWKIRK ENVIRONMENTAL, INC.**  
**POST OFFICE BOX 746**  
**MOUNT PLEASANT, SOUTH CAROLINA 29465-0746**

for a permit to place fill material in waters of the United States in

**DARRELL CREEK**

near the intersection of US Highway 17 and Darrell Creek Road in Mount Pleasant, Charleston County (Latitude 79.76515, Latitude 32.88372).

In order to give all interested parties an opportunity to express their views

**NOTICE**

is hereby given that written statements regarding the proposed work will be received by both of the above mentioned offices until

**12 O'CLOCK NOON, MONDAY, 10 MAY 2004**

from those interested in the activity and whose interests may be affected by the proposed work.

The proposed work consists of the construction of a mixed-use development on a 1608.5-acre site. The landowner has negotiated a 20-year Planned Unit Development with Charleston County, which identifies both allowable land uses and density. The approved land uses include single and multi-family residential, commercial, office, institutional, industrial/economic development, open space, and public use facilities. The industrial portion of the proposed project will consist of a business park for non-polluting industries such as bio-tech and research and development. The applicant has agreed to donate approximately 140 acres of land for the construction of a public library, a centrally located Police/Fire/EMS station, public parks/recreation areas, an elementary school, and a higher education facility.

The development plan includes the construction of an internal roadway system that will provide access to shopping and office areas without the need for area residents to use US Highway 17. The applicant plans to fill 4.64 acres of jurisdictional wetlands and 3.91 acres of non-jurisdictional wetlands to construct access roads throughout the site. The applicant plans to clear 0.04-acres of jurisdictional wetlands and 0.15-acres of non-jurisdictional wetlands to install utility lines, and to clear 0.21 acres of jurisdictional wetlands for pedestrian boardwalks. The applicant also plans to excavate 1.42 acres of jurisdictional wetlands and 1.13 acres of non-jurisdictional wetlands for stormwater purposes.

An additional 4.94 acres of jurisdictional wetlands and 17.66 acres of non-jurisdictional wetlands will be impacted for various other site development activities as indicated on the wetland master plan. A key that identifies the type of wetland system and the proposed activity is located on drawing sheet 1 of 31. The applicant has submitted a mitigation plan that consists of the preservation of 203.92 acres of unaltered jurisdictional/non-jurisdictional wetlands and the preservation of 155.74 acres of upland buffers. The proposed buffers are an average width of 79 feet in residential areas, 55 feet in commercial areas, and 52 feet in the economic development areas. In addition, the applicant plans to purchase 202.3 non-buffer enhancement credits from the Pigeon Pond Mitigation Bank.

According to the applicant the purpose of the proposed project is to create an economically viable, long term up-scale, mixed use, master planned development consisting of industrial/economic development, commercial, office, residential, open space, and public use areas.

**NOTE: Plans depicting the work described in this notice are available and will be provided, upon receipt of a written request, to anyone that is interested in obtaining a copy of the plans for the specific project. The request must identify the project of interest by public notice number and a self-addressed stamped envelope must also be provided for mailing the drawings to you. Your request for drawings should be addressed to the**

**U.S. Army Corps of Engineers  
ATTN: REGULATORY DIVISION  
69A Hagood Avenue  
Charleston, South Carolina 29403-5107.**

The District Engineer has concluded that the discharges associated with this project, both direct and indirect, should be reviewed by the South Carolina Department of Health and Environmental Control in accordance with provisions of Section 401 of the Clean Water Act. As such, this notice constitutes a request, on behalf of the applicant, for certification that this project will comply with applicable effluent limitations and water quality standards. The work shown on this application must also be certified as consistent with applicable provisions of the South Carolina Coastal Zone Management Act (15 CFR 930). The District Engineer will not process this application to a conclusion until such certifications are received. The applicant is hereby advised that supplemental information may be required by the State to facilitate the review. Persons wishing to comment or object to State certification must submit all comments in writing to the S.C. Department of Health and Environmental Control at the above address within thirty (30) days of the date of this notice.

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Implementation of the proposed project would impact 12.18 acres of jurisdictional wetlands and 23.63 acres of non-jurisdictional impacts upstream of estuarine substrates and emergent wetlands utilized by various life stages of species comprising the red drum, shrimp, and snapper-grouper management complexes. Our initial determination is that the proposed action would not have a substantial individual or cumulative adverse impact on EFH or fisheries managed by the

Refer to: P/N # 2004-1N-081-C

South Atlantic Fishery Management Council and the National Marine Fisheries Service (NMFS). Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the NMFS.

The District Engineer has consulted the most recently available information and has made no determination of effect on any Federally endangered, threatened, or proposed species. This public notice serves as a request to the U.S. Fish and Wildlife Service and the National Marine Fisheries Service for any additional information they may have on whether any Federally listed or proposed to be listed endangered or threatened species and/or designated or proposed critical habitat may be present in the area which would be affected by the activity, pursuant to Section 7(c) of the Endangered Species Act of 1973 (as amended).

The District Engineer has consulted the latest published version of the National Register of Historic Places for the presence or absence of registered properties, or properties listed as being eligible for inclusion therein, and this worksite is not included as a registered property or property listed as being eligible for inclusion in the Register. Consultation of the National Register constitutes the extent of cultural resource investigations by the District Engineer, and he is otherwise unaware of the presence of such resources. Presently unknown archaeological, scientific, prehistorical, or historical data may be lost or destroyed by the work to be accomplished under the requested permit.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for a public hearing shall state, with particularity, the reasons for holding a public hearing.

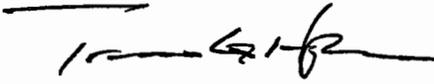

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the activity on the public interest and will include application of the guidelines promulgated by the Administrator, Environmental Protection Agency (EPA), under authority of Section 404(b) of the Clean Water Act and, as appropriate, the criteria established under authority of Section 102 of the Marine Protection, Research and Sanctuaries Act of 1972, as amended. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the project must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the project will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production and, in general, the needs and welfare of the people. A permit will be granted unless the District Engineer determines that it would be contrary to the public interest. In cases of conflicting property rights, the Corps of Engineers cannot undertake to adjudicate rival claims.

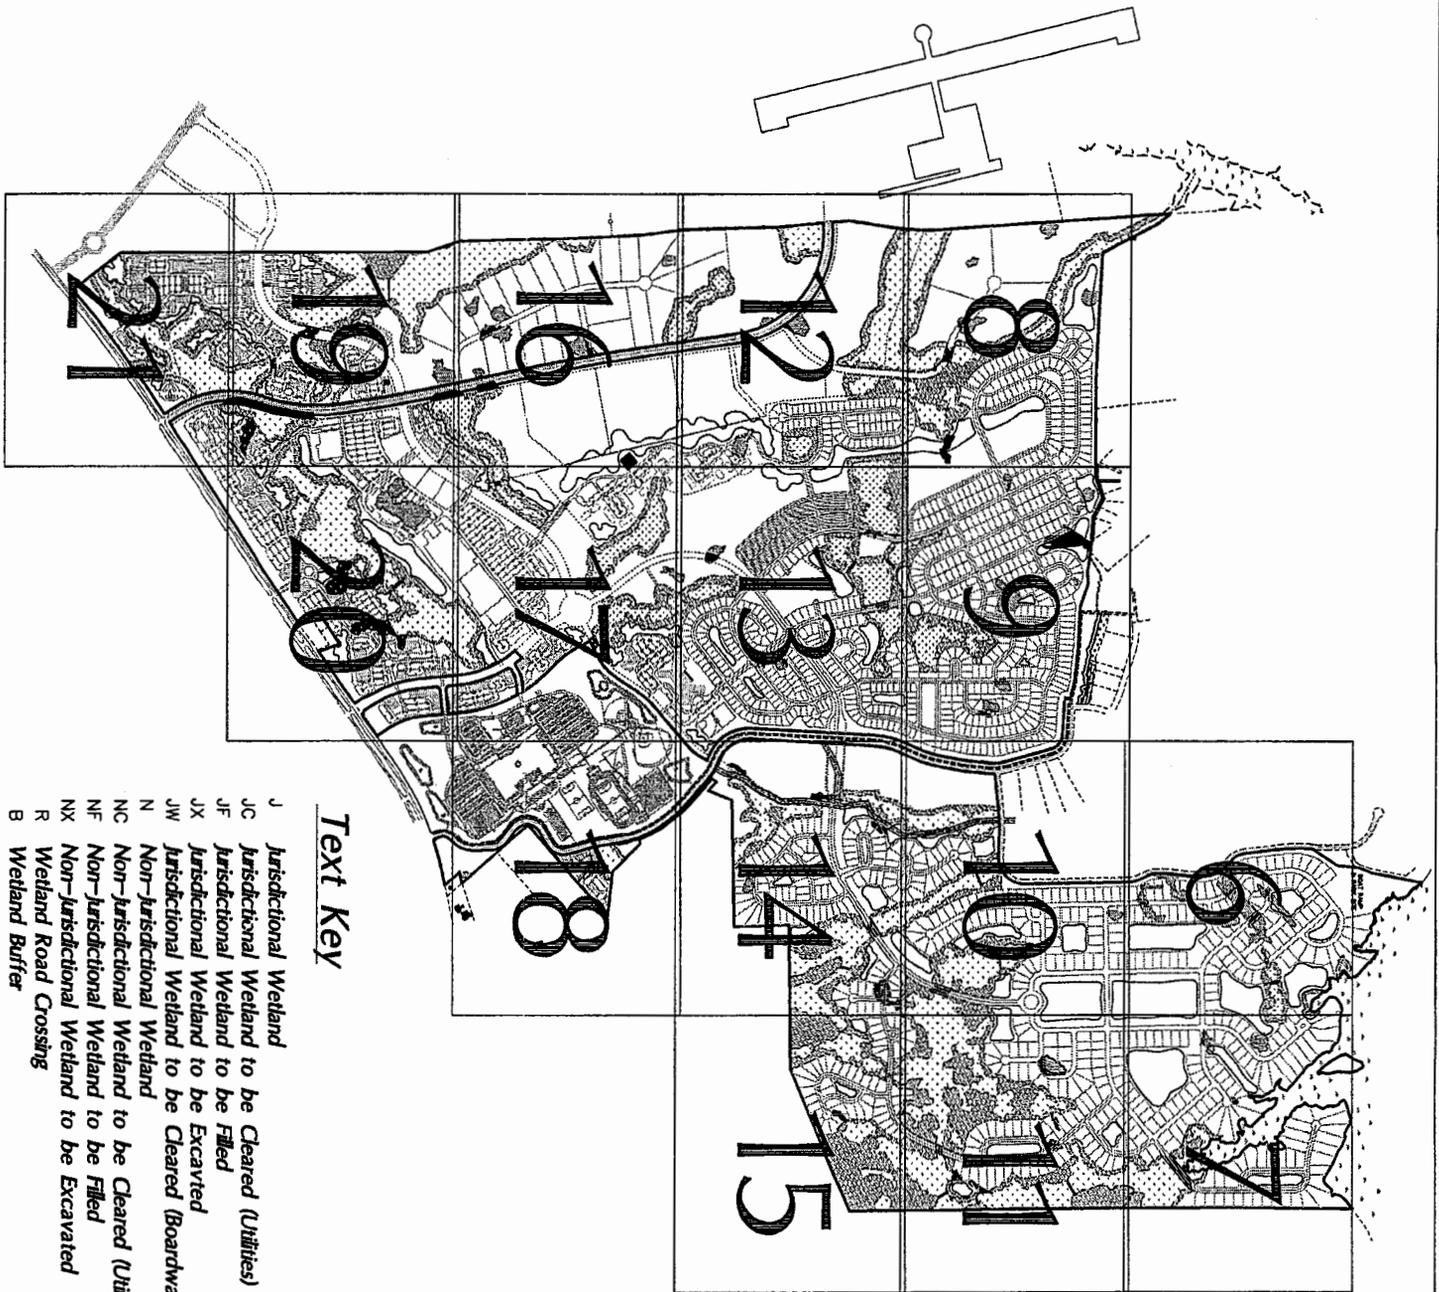

The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this project. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the activity.
