and the  
**S.C. DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL**  
**OFFICE OF OCEAN AND COASTAL RESOURCE MANAGEMENT**  
**1362 McMillan Avenue, Suite 400**  
**Charleston, South Carolina 29405**

REGULATORY DIVISION

Refer to: P/N #2004-1W-319-P

22 OCTOBER 2004

Pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403), Sections 401 and 404 of the Clean Water Act (33 U.S.C. 1344), and the South Carolina Coastal Zone Management Act (48-39-10 et seq.) an application has been submitted to the Department of the Army and the S.C. Department of Health and Environmental Control by

**TOWN OF HILTON HEAD ISLAND**  
**c/o OLSEN ASSOCIATES, INC.**  
**4438 HERSCHEL STREET**  
**JACKSONVILLE, FLORIDA 32210**

for a permit to perform beach nourishment at two locations along the shoreline of the

**ATLANTIC OCEAN AND CALIBOGUE SOUND**

at two locations: 1) along 29,000 feet of the Atlantic Shoreline between the existing terminal groin at The Folly, the tidal creek between Singleton Beach and Bradley Beach, and Alder Lane in South Forest Beach (Latitude 32.1519°, Longitude 80.7287°) and 2) along 1,500 feet of the Atlantic Ocean/Calibogue Sound shoreline at South Beach (Latitude 32.1092°, Longitude 80.8263°) on Hilton Head Island, Beaufort County, South Carolina

using sand from two offshore borrow sites: 1) Joiner Shoals, offshore of the northern end of Hilton Head Island (Latitude 32.1613°, Longitude 80.6233°) and 2) Barrett Shoals, offshore of the southern end of Hilton Head Island (Latitude 32.0610°, Longitude 80.8047°).

In order to give all interested parties an opportunity to express their views

**NOTICE**

is hereby given that written statements regarding the proposed work will be received by both of the above mentioned offices until

**12 O'CLOCK NOON, MONDAY, 22 NOVEMBER 2004**

from those interested in the activity and whose interests may be affected by the proposed work.

The proposed work consists of the placement of approximately 1.9 million cubic yards of

REGULATORY DIVISION

Refer to: P/N #2004-1W-319-P

22 OCTOBER 2004

sand along 30,500 feet of the Atlantic Ocean shoreline and the Calibogue Sound shoreline on Hilton Head Island, South Carolina. Approximately 1.8 million cubic yards (+/- 10%) will be placed along 29,000 feet of the Atlantic Shoreline between the existing terminal groin at The Folly, the tidal creek between Singleton Beach and Bradley Beach, and Alder Lane in South Forest Beach. This reach of shoreline was originally restored in 1990 (PN 87-3T-370-P) and renourished in 1997 (PN 96-1A-038-P). Approximately 100,000 cubic yards (+/- 10%) will be placed along 1,500 feet of the Atlantic Ocean/Calibogue Sound shoreline at South Beach. This shoreline was originally restored in 1999 (PN 97-1A-459-P). According to the applicant, the purpose of the project, which is a component of the Town of Hilton Head's comprehensive beach management program, is to provide beach restoration along eroding sections of shoreline sufficient to maintain the island's restored protective and recreational beachfront and natural dune system. The project also includes a 25 foot extension of the existing groin located at The Folly as shown on sheet 8 of 8. The purpose of this portion of the project, according to the applicant, is to reduce the loss of sand from the adjacent beach into The Folly.

**NOTE: Plans depicting the work described in this notice are available and will be provided, upon receipt of a written request, to anyone that is interested in obtaining a copy of the plans for the specific project. The request must identify the project of interest by public notice number and a self-addressed stamped envelope must also be provided for mailing the drawings to you. Your request for drawings should be addressed to the**

**U.S. Army Corps of Engineers  
ATTN: REGULATORY DIVISION  
69A Hagood Avenue  
Charleston, South Carolina 29403-5107.**

The District Engineer has concluded that the discharges associated with this project, both direct and indirect, should be reviewed by the South Carolina Department of Health and Environmental Control in accordance with provisions of Section 401 of the Clean Water Act. As such, this notice constitutes a request, on behalf of the applicant, for certification that this project will comply with applicable effluent limitations and water quality standards. The work shown on this application must also be certified as consistent with applicable provisions the Coastal Zone Management Program (15 CFR 930). The District Engineer will not process this application to a conclusion until such certifications are received. The applicant is hereby advised that supplemental information may be required by the State to facilitate the review.

This notice initiates the Essential Fish Habitat (EFH) consultation requirements of the Magnuson-Stevens Fishery Conservation and Management Act. Implementation of the proposed project would impact 515 acres of estuarine substrates and emergent wetlands utilized by various life stages of species comprising the red drum, shrimp, and snapper-grouper management complexes. Our initial determination is that the proposed action would not have a substantial individual or cumulative adverse impact on EFH or fisheries managed by the South Atlantic Fishery Management Council and the National Marine Fisheries Service (NMFS). Our final determination relative to project impacts and the need for mitigation measures is subject to review by and coordination with the NMFS.

The District Engineer has consulted the most recently available information and has

REGULATORY DIVISION

Refer to: P/N #2004-1W-319-P

22 OCTOBER 2004

determined that the project is likely to adversely affect the loggerhead sea turtle, *Caretta caretta*, and/or is likely to adversely affect designated critical habitat of the piping plover, *Charadrius melodus*. This public notice serves as a request to the U.S. Fish and Wildlife Service and/or the National Marine Fisheries Service to initiate formal consultation on these species and/or critical habitat that may be present in the area which would be affected, pursuant to Section 7(c) of the Endangered Species Act of 1973 (as amended). Please note that a biological opinion on the loggerhead sea turtle was prepared (FWS Log No. 4-6-98-129) dated March 26, 1998, for the project previously permitted, P/N 97-1A-439-P.

The District Engineer has consulted the latest published version of the National Register of Historic Places for the presence or absence of registered properties, or properties listed as being eligible for inclusion therein, and this worksite is not included as a registered property or property listed as being eligible for inclusion in the Register. Consultation of the National Register constitutes the extent of cultural resource investigations by the District Engineer, and he is otherwise unaware of the presence of such resources. Presently unknown archaeological, scientific, prehistorical, or historical data may be lost or destroyed by the work to be accomplished under the requested permit.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for a public hearing shall state, with particularity, the reasons for holding a public hearing.

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the activity on the public interest and will include application of the guidelines promulgated by the Administrator, Environmental Protection Agency (EPA), under authority of Section 404(b) of the Clean Water Act and, as appropriate, the criteria established under authority of Section 102 of the Marine Protection, Research and Sanctuaries Act of 1972, as amended. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the project must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the project will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production and, in general, the needs and welfare of the people. A permit will be granted unless the District Engineer determines that it would be contrary to the public interest. In cases of conflicting property rights, the Corps of Engineers cannot undertake to adjudicate rival claims.

The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this project. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an
