Charleston District

Project Fact Sheet

PAS - Water Use and Demand Study

South Carolina

P2#: 457159

Congressional Districts: Mark Sanford (SC-1)

Appropriation:

Investigations

Phase:

NA

Business Line:

NA

Authority:

Location

Water Basins in the State of South Carolina.

Description:

Project

Description:

Water use and demand forecasts for the next 50 years will be an integral part of formulating comprehensive water policy and updating the State Water Plan. An agreement dated May 25, 2016 established a partnership between the Corps, USGS, and SC DNR for a comprehensive water use and demand study for the Savannah River water basin. The follow-on study, agreement dated May 23, 2018, will focus on developing an overall scope, focusing on stakeholder input, to complete an update to the State Water Plan and will also continue the partnership with USGS to develop groundwater modeling for the State.

Current

Status:

As of 26 November 2018 - The first study commenced in June 2016 and a draft report was delivered to the non-Federal sponsor in November 2017. The District commenced a second study in May 2018 with an estimated duration of 12 months.
