

**US Army Corps
of Engineers**

Charleston District

Program Fact Sheet

Support To Joint Base Charleston

Program Description and Location:

The Joint Base Charleston (JBC) community encompasses more than 20,000 active-duty, reserve and civilian personnel, located on the Air Base and the Weapons Station which together makeup 20,400 acres. Personnel at the Air Base, Weapons Station, the local community and the Department of Defense believe Joint Basing is the stepping stone to making Charleston a Joint Logistics, Transportation and Engineering Hub and the worldwide leader in moving people, vehicles, munitions, and supplies via air, land, sea, and rail.

Joint Base Charleston is unique with over 53 tenants. Joint Base Charleston is comprised of Air Force, Navy, Army, Marine Corps, Coast Guard, Homeland Security, and other DOD missions - all working together in the global fight against terrorism

Program Current Status:

As of 15 April 2019 - In FY 18 we awarded 17 projects at JBC with customers including Space and Naval Warfare Systems Center (SPAWAR), the Surface Deployment and Distribution Command (SDDC), Naval Health Clinic Charleston (NHCC), the Naval Consolidated Brig, Joint Base Charleston (JBC) and the Nuclear Power Training Unit (NPTU). Total awards amounted to nearly \$90M. This was the largest annual award amount in program history.

Significant projects include the following:

- \$59.1M Visitors Quarters building, a new construction 266 room hotel.
- \$16.2M Water Intrusion Repairs at NHCC.
- \$3.1M Lighting Repairs at JBC.
- \$2.3M Repair Building 3410 at SPAWAR.
- \$3.4M Repair Various Buildings at JBC (Short Stay).

The FY 19 workload is projected to be higher than average once again. We are working towards the projected award of a \$10M project to construct a new Temporary Lodging Facility at JBC, and multiple construction contracts for SPAWAR, SDDC, NHCC, and JBC. Overall, the FY19 workload is projected to be approximately 14 contract awards valued at \$19M.

Future Activities:

Charleston District will continue to provide support to JBC on an annual basis as workload and funding is provided from the customer. SRM budgets are estimated to remain similar. The FY20 program is expected to be similar to the FY16 Program (30 projects valued at \$5.8M).
