Project Fact Sheet

FUDS - Donaldson AFB, SC

Greenville County, SC

P2#: 147998

Congressional Districts: William Timmons (SC-4)

Appropriation:	Phase:	Business Line:
Formerly Used Defense Sites	Various	NA

Authority: Sec 211, Superfund Amendments and Reauthorization Act of 1986

Location Description: The Former Donaldson Air Force Base is located in Greenville, South Carolina at the current Donaldson Industrial Center. The site was used as an operational air base from 1942 until January 24, 1964. After WWII, the base was closed and later reopened as the Global Headquarters of the Military Air Transport Command (MATC) and renamed Donaldson Air Force Base in 1951. The property was transferred to the City and County of Greenville, South Carolina in 1964. It is currently owned 50/50 by the city and county, with some private industrial ownership of the peripheral areas.

Project Description: The property contains many Areas of Concern, sites and sub-sites that are actively being addressed, including landfills, aircraft wash sites, underground storage tanks and fuel fields.

Current Status: A Remedial Action (RA) contract was awarded in September 2014 and consists of adding soil to the landfill cover and groundwater monitoring. The RA was initiated in February 2016 with the abandonment and sampling of several monitoring wells. Field work associated with the landfill cover was completed in July 2019. An additional project (06) deals with a former disposal area where metals and hydrocarbons have been detected. USACE is currently conducting additional field work to address SC DHEC concerns and anticipates completing the Remedial Investigation (RI) report in FY20. Subsequent phases (Feasibility Study, Proposed Plan, Decision Document) will be conducted upon completion of the RI report. A contract was awarded in FY19 to conduct a corrective action for several underground storage tanks (UST) sites. Long term monitoring (LTM) is currently being conducted for several other UST sites. FUDS Program Management for this region (GA, SC and NC) is supported through Savannah District. Support to specific FUDS projects in SC is currently supported through Wilmington District.

Project 03: USACE is currently preparing a five year review report (FYR) for Project 03 (landfill cover completed in July 2019). The FYR is required by CERCLA when hazardous substances are left at a site which preclude unrestricted use of the site and evaluates whether the remedial action implemented is still protective of human health. The FYR is anticipated to be completed in May 2021.

Project 06: USACE will submit a revised Draft Final Remedial Investigation (RI) report to SC DHEC on 4 April 2021. The Draft Final Report recommends no further action based on evaluation of the RI data.

Project 08: Contractor is planning for field work in the summer 2021 to conduct the corrective action (subsurface injection and soil excavation) to address contamination associated with former underground storage tanks (USTs).
