B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: *There are no jurisdictional aquatic resources within the project boundary. A large stream head-cut is just north and outside of the project boundary, but within the same property, marks the beginning of a relatively permanently flowing stream that appears to be driven by groundwater inputs. This project area consists entirely of uplands.*

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
