¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: The 1.99-acre site assessed on this form consists entirely of uplands. Soil survey information indicates the site as a Norfolk-Noboco soil type which is non-hydric. National Wetlands Inventory maps depict the site as uplands. Topographic maps do not depict any aquatic resources onsite. In addition, the consultant's data sheets and site photographs further document the site as uplands.
