¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: After assessing the best available information and the supplemental information submitted by the consultant, the site assessed on this form was determined to consist entirely of uplands. Soil survey information depicts the entire site as non-hydric soils. National Wetlands Inventory maps depict the site as uplands. In addition, there are no tributaries or other aquatic resources depicted on topographic maps.
