B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

This project area consists of 0.5 acres of uplands located at 105 Silver Hill Lane Pawleys Island, MD. Aerial images show a residential area. USGS topographic survey information within the Waverly Mills quad depicts an upland forested area that is void of any blue line features or any other symbols that would represent a wetland. Soil survey information shows the project area comprised of the partially hydric soil Echaw sand. NWI maps depict the entire project area as upland residential. Based on a combination of the above listed resources, the project area was determined to be void of aquatic resources.
