**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** The soil survey shows the site contains Johnston soils, which are classified as a hydric soil. However, the site and surrounding area is comprised of residential development that has been in existence for years. No reviewed maps indicate that the site contains aquatic features and the data sheets submitted by the consultant supports this determination. The project area consists entirely of dry lands.

<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.
