A. SUPPORTING DATA. Data reviewed for JD (check all that apply - checked items shall be included in case file and, where checked and requested, appropriately reference sources below):

- Maps, plans, plots or plat submitted by or on behalf of the applicant/consultant: The site is shown on the depiction titled "Wetland Delineation/Determination Map / Facilities Department / TMS #: 05-0025-024-00-00Georgetown County, South Carolina / Tax Map Number 05-0044-066-00-00 (Portion of)," prepared by the Brigman Company and dated October 14, 2019.
- Data sheets prepared/submitted by or on behalf of the applicant/consultant.
- Office concurs with data sheets/delineation report.
 Office does not concur with data sheets/delineation report.
- Data sheets prepared by the Corps:
- U.S. Geological Survey Hydrologic Atlas:
 USGS NHD data.
 USGS 8 and 12 digit HUC maps.
- U.S. Geological Survey map(s). Cite scale & quad name: 1:24k Georgetown South Quad; Georgetown South Quad depicts the project area as consisting entirely of uplands. There are no blue line features of other symbols that would typically represent a WOUS .
- USDA Natural Resources Conservation Service Soil Survey. Citation: Soil survey information depicts the entire site as Yemassee loamy fine sand; a partially hydric soil (1-25%)
- National wetlands inventory map(s). Cite name: NWIs depict the site as entirely uplands.
- State/Local wetland inventory map(s):
- FEMA/FIRM maps:
- 100-year Floodplain Elevation is: (National Geodetic Vertical Datum of 1929)
- Photographs: Aerial (Name & Date): SCDNR 2006, Google Earth 2019, ESRI 2018
 Other (Name & Date): Site photos submitted by the agent dated October 9, 2019.
- Previous determination(s). File no. and date of response letter:
- Applicable/supporting case law:
- Applicable/supporting scientific literature:
- Other information (please specify):

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: This form addresses a 4.16 acre site that was determined to consist entirely of uplands. The site in questions is consistently depicted as uplands in aerial photographs, USGS topo maps, and NWIs. Although soil survey data does depict partially hydric soils onsite data sheets and photos submitted by the consultant document non-hydric soils. The site consist of a developed lot

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

located in a heavily developed residential/commercial area. Based on a review of all available desk top resources there are no indicators of potential aquatic resources on site.
