

## U.S. ARMY CORPS OF ENGINEERS REGULATORY PROGRAM APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM) NAVIGABLE WATERS PROTECTION RULE

## I. ADMINISTRATIVE INFORMATION

Completion Date of Approved Jurisdictional Determination (AJD): 22-MAR-2021 ORM Number: SAC-2020-01217 Associated JDs: N/A Review Area Location<sup>1</sup>: State/Territory: SC City: Pageland County: Chesterfield County Center Coordinates of Review Area: Latitude 34.702638 Longitude -80.463462

### II. FINDINGS

- **A. Summary:** Check all that apply. At least one box from the following list MUST be selected. Complete the corresponding sections/tables and summarize data sources.
  - The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: N/A
  - There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in section II.B).
  - There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in section II.C).
  - There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in section II.D).

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form. <sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

			appears to be directly in response to precipitation.	
			According to the photos submitted by the agent, this	
			feature lacks leaf litter; however, debris and rocks were	
			observed even though the stream channel had a high	
			rate of elevation change as indicated by the step-pool	
			morphology present in the channel. This feature is not

			NWIs. Therefore, Excluded Water 1 was determined to	
			be non-jurisdictional.

- **B. Typical year assessment(s):** Antecedent Rainfall Calculator data for typical year determination was calculated based on the field collection date provided by the agent (11 Aug 2020). The Antecedent Rainfall Calculator data showed "normal" conditions at the time of data collection by the agent with a condition value of 14, which indicates that typical year hydrologic conditions were present. For this assessment, ten weather stations, located within a 20-mile radius, were used.
- C. Additional comments to support AJD: The area in review contains 4.66 acres and includes one excluded water. The onsite (upstream) portion of this linear feature is not depicted on the topographic map, and the site is mapped uplands on the NWIs and as Rion, a non-hydric soil, on the soil survey. Excluded water 1 is a naturally occurring stream; however, it was determined to have ephemeral flow. Therefore, Excluded Water 1 was determined to be non-jurisdictional.
