¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use

that no areas within the project area meet the three parameters for wetland. A linear ditch feature existed on site but did not exhibit any flow regime, or ordinary high water mark (OHWM). In addition, this feature was excavated wholly in uplands and drains only uplands. Therefore, no CWA Section 404 wetlands/waters exist on site.
