<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** The project area is comprised of 9.27 acres of uplands located south of and adjacent to Village Center Blvd in Myrtle Beach, SC. USGS topographic survey information depicts an upland forested area. NWI maps depict the entire project area as upland planted pine. The project area is comprised of the hydric soils Leon and Echaw. Leon is 100% hydric while Echaw contains 2% hydric inclusions. Based on a combination of the above listed resources as well as data sheets submitted by the agent, the project area was determined to be void of aquatic resources.
