B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:

¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

This 0.20 acre project site is located within a previously developed residential lot that currently houses a home and a small section of uplands around the domicile. Aerial imagery from 1999-2017, LiDAR aerial imagery, and recent site photos support that this project site is a non-forested upland residential lot with no aquatic resources within the project boundaries.

The Cheraw quadrangle USGS topographic map depicts the site as non-forested with no aquatic resources, blue line features, or wetland symbology within the project site. Chesterfield County soil survey, pg. 24, depicts one hydric soils within the project site, Noboco loamy sand (0 to 2 percent slopes) (NoA). National Wetland Inventory (NWI) maps depict an upland site with a residential (U11) and commercial (U12) land types. LiDAR Digital Elevation Model (DEM) aerial imagery depicts no significant elevation changes, ditching, or other features indicative of aquatic resources within the project site. Aerial imagery (dated 1999-2017) do not show any roadside ditching or other potential aquatic resources within the project area.

This 0.20 acre project site contains 0 acres/linear feet of jurisdictional resources. This site was assessed per the provided project area maps and on a single-basis form.
