REGULATORY PROGRAM  
APPROVED JURISDICTIONAL DETERMINATION FORM (INTERIM)  
NAVIGABLE WATERS PROTECTION RULE

**I. ADMINISTRATIVE INFORMATION**

Completion Date of Approved Jurisdictional Determination (AJD): 17-MAY-2021

ORM Number: SAC-2021-00427

Associated JDs: N/A

Review Area Location<sup>1</sup>:

State: SC City: Myrtle Beach County: Horry County

Center Coordinates of Review Area: Latitude 33.7066 Longitude -78.9401

**II. FINDINGS**

**A. Summary:** Check all that apply. At least one box from the following list **MUST** be selected. Complete the corresponding sections/tables and summarize data sources.

- The review area is comprised entirely of dry land (i.e., there are no waters or water features, including wetlands, of any kind in the entire review area). Rationale: The review area is void of all three parameters that define a wetland as defined in the Corps' 1987 Wetland Delineation Manual and Regional Supplement, and other waters of the US. The review does contain upland excavated ditches that were determined not to be an aquatic resource. These ditches have been excavated in uplands and drain only uplands.
- There are "navigable waters of the United States" within Rivers and Harbors Act jurisdiction within the review area (complete table in section II.B).
- There are "waters of the United States" within Clean Water Act jurisdiction within the review area (complete appropriate tables in section II.C).
- There are waters or water features excluded from Clean Water Act jurisdiction within the review area (complete table in section II.D).

<sup>2</sup> If the navigable water is not subject to the ebb and flow of the tide or included on the District's list of Rivers and Harbors Act Section 10 navigable waters list, do NOT use this document to make the determination. The District must continue to follow the procedure outlined in 33 CFR part 329.14 to make a Rivers and Harbors Act Section 10 navigability determination.

<sup>3</sup> A stand-alone TNW determination is completed independently of a request for an AJD. A stand-alone TNW determination is conducted for a specific segment of river or stream or other type of waterbody, such as a lake, where independent upstream or downstream limits or lake borders are established. A stand-alone TNW determination should be completed following applicable guidance and should NOT be documented on the AJD form.

<sup>4</sup> Some excluded waters, such as (b)(2) and (b)(4), may not be specifically identified on the AJD form unless a requestor specifically asks a Corps district to do so. Corps Districts may, in case-by-case instances, choose to identify some or all of these waters within the review area.

<sup>5</sup> Because of the broad nature of the (b)(1) exclusion and in an effort to collect data on specific types of waters that would be covered by the (b)(1) exclusion, four sub-categories of (b)(1) exclusions were administratively created for the purposes of the AJD Form. These four sub-categories are not new exclusions, but are simply administrative distinctions and remain (b)(1) exclusions as defined by the NWPR.

**III. SUPPORTING INFORMATION**

**A. Select/enter all resources** that were used to aid in this determination and attach data/maps to this document and/or references/citations in the administrative record, as appropriate.

Information submitted by, or on behalf of, the applicant/consultant: *AJD request submitted by S&ME, Inc., on behalf of Brad Queener, Bradley Development Company dated March 1, 2021.*

This information is sufficient for purposes of this AJD.

Rationale: *The wetland data forms, and additional information submitted by the agent are a reasonable representation of site conditions at the time of collection and are sufficient for purposes of this AJD.*

Data sheets prepared by the Corps: *N/A.*

Photographs: *(aerial and other) Google Earth aerial photo 2019, 2006 SCDNR aerial photo, Site photos taken by the agent dated March 1, 2021.*

Corps Site visit(s) conducted on: *N/A.*

Previous Jurisdictional Determinations (AJDs or PJDs): *none.*

Antecedent Precipitation Tool: *provide detailed discussion in Section III.B.*

USDA NRCS Soil Survey: *NRCS / Soil Survey Geographic Database (SSURGO) Map Service dated April 4, 2019, updated August 26, 2020, ESRI Map Service depicts the soil types of Meggett and Blanton.*

USFWS NWI maps: *USFWS NWI - Wetlands Raster REST Map Service dated May 29, 2012, updated July 17, 2020, USFWS NWI Map Service Map depicts the entire review as uplands.*

USGS topographic maps: *USGS topographic maps: USGS Topographic Map / 7.5 Minute Index / Myrtle Beach Quad / 1:24000. Topographic map depicts the review area as upland forested area. No symbols that typically represent a potential water are depicted on the topographic map. Topographic map does not depict a symbol that typically represents an A(1)-A(3) within the review area or in close proximity of review area.*
