<sup>1</sup> This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

**B. REQUIRED ADDITIONAL COMMENT TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND:** A desktop review was performed for this site. After reviewing the best available information (i.e. supplemental information submitted by the applicant, aerial photographs, soil survey information, topographic maps, and NWI maps), it was determined that the review area consists entirely of uplands. Hydric soils were observed on a portion of the site. However, no indicators of hydrology were observed by the consultant and is demonstrated on the wetland data sheets.
