Sumter East Quad depicts the project area as cleared uplands that do not contain any blue line features or
other symbols that would typically represent a WOUS.
☐ USDA NRCS Soil Survey. Citation: Sumter County Soil Survey Sheet 70; Sumter County Soil Survey
information depicts the project area as being comprised entierly of Lucy Sand. Lucy Sand is a well drained non-hydric soil.
USFWS National Wetlands Inventory maps. Citation: U11; NWIs depict the entire project area as upland
residential land.
State/Local wetland inventory maps. Citation:
FEMA/FIRM maps. Citation:
Photographs: Aerial. Citation: Sumter County Aerial Index 99:11204:98 and SCDNR 2006.
Aerial photographs depict a cleared residential lot that does not contain any features that would typically
indicate the presence of WOUS.

(b)(1): Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of
the CWA.
(b)(2): Prior converted cropland.
(b)(3)(i): Ditches with ephemeral flow that are not a relocated tributary or excavated in a tributary.
(b)(3)(ii): Ditches with intermittent flow that are not a relocated tributary, excavated in a tributary, or drain
wetlands.
(b)(3)(iii): Ditches that do not flow, either directly or through another water, into a water identified in
paragraphs (a)(1)-(a)(3).
(b)(4)(i): Artificially irrigated areas that would revert to dry land should application of water to that area cease.
(b)(4)(ii): Artificial, constructed lakes and ponds created in dry land such as farm and stock watering ponds,
irrigation ponds, settling basins, fields flooded for rice growing, log cleaning ponds, or cooling ponds.
(b)(4)(iii): Artificial reflecting pools or swimming pools created in dry land.1
(b)(4)(iv): Small ornamental waters created in dry land.1
(b)(4)(v): Water-filled depressions created in dry land incidental to mining or construction activity, including
pits excavated for obtaining fill, sand, or gravel that fill with water.
(b)(4)(vi): Erosional features, including gullies, rills, and other ephemeral features that do not meet the
definition of tributary, non-wetland swales, and lawfully constructed grassed waterways.
(b)(4)(vii): Puddles. <sup>1</sup>
(b)(5): Groundwater, including groundwater drained through subsurface drainage systems.1
(b)(6): Stormwater control features constructed to convey, treat, or store stormwater that are created in dry
land.1
(b)(7): Wastewater recycling structures created in dry land; detention and retention basins built for wastewater
recycling; groundwater recharge basins; percolation ponds built for wastewater recycling; and water
distributary structures built for wastewater recycling.
Other non-jurisdictional waters/features within review area that do not meet the definitions in 33 CFR 328.3 of
(a)(1)-(a)(8) waters and are not excluded waters identified in (b)(1)-(b)(7).

<sup>&</sup>lt;sup>1</sup> In many cases these excluded features will not be specifically identified on the approved JD form, unless specifically requested. Corps Districts may, in case-by-case instances, choose to identify some or all of these features within the review area.

D. ADDITIONAL COMMENTS TO SUPPORT JD: This form addresses a 0.21 acre residential lot located within the City of Sumter. Aerial photographs depict a cleared residential lot that does not contian any features that would typically indicated the presence of WOUS. Within the project area NWIs depict residential uplands and Sumter County soil survey information depicts well drained non-hydric soils. USGS topographic maps depict cleared uplands that do not contain any blue line features or other symbols that would typically represent a WOUS. Sumter County LiDAR data depicts level high ground that does not contian any depressional or linear features. Due to the consistent depiction of uplands throughout all of the desk top resources available to this office the project area was determined to consist entirely of dry land.
