¹ This form is for use only in recording approved JDs involving dry land. It extracts the relevant elements of the longer approved JD form in use since 2007 for aquatic areas and adds no new fields.

B. REQUIRED ADDITIONAL COMMENTS TO SUPPORT JD. EXPLAIN RATIONALE FOR DETERMINATION THAT THE REVIEW AREA ONLY INCLUDES DRY LAND: This form addresses 5 acres of uplands west of and adjacent to Murrells Inlet Road, Murrells Inlet, SC. USGS topographic survey information depicts forested area that is void of wetland symbols and blue line features. The project area is comprised of the partially hydric soil Chipley fine sand and the non-hydric soil Centenary fine sand. NWI maps show the entire project area as uplands. Based on the consistency in the depiction of uplands the project area was determined to be void of aquatic resources.
