Division engineers are authorized to add regional conditions specific to the needs and/or requirements of a particular regional or state. Regional conditions are important mechanisms to ensure that impacts to the aquatic environment authorized by the NWP are minimal, both individually and cumulatively. The Charleston District's proposal to add regional conditions was noticed on September 29, 2020, and comments were received.

The Charleston District's regional conditions were approved by the South Atlantic Division Commander on February 16, 2021, and a public notice was issued on March 8, 2021, announcing the "FINAL REGIONAL CONDITIONS FOR 16 NATIONWIDE PERMITS IN CHARLESTON DISTRICT (SAC)." These regional conditions for the **16 NWP**s listed above became effective on March 15, 2021.

After further consideration of comments received in response to the September 29, 2020, public notice of the Charleston District's proposal to add regional conditions for the 16 NWP's, and to provide additional protection for the aquatic environment to further ensure that the 16 NWP's authorize only those activities with no more than minimal adverse environmental effects, the South Atlantic Division is modifying the existing Regional Conditions C.3, C.4, C.5, D.3, D.4, D.6, D.8, D.9, D.10, D.11 and D.17 of the "FINAL REGIONAL CONDITIONS FOR 16 NATIONWIDE PERMITS IN CHARLESTON DISTRICT (SAC)." In addition, the South Atlantic Division is including two (2) new regional conditions, C.6 and D.18. The modified Regional Conditions are listed below in Part II and new Regional Conditions are listed below in Part III.

Enclosed with today's public notice are the "FINAL REGIONAL CONDITIONS FOR 16 NATIONWIDE PERMITS IN CHARLESTON DISTRICT (SAC) - MODIFIED."
