

**JOINT
PUBLIC NOTICE**

CHARLESTON DISTRICT, CORPS OF ENGINEERS

1949 Industrial Park Road, Room #140

Conway, South Carolina 29526

and

THE S.C. DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL

Water Quality Certification and Wetlands Section

2600 Bull Street

Columbia, South Carolina 29201

REGULATORY DIVISION

Refer to: P/N SAC-2019-01427

June 22, 2020

Pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403) and Sections 401 and 404 of the Clean Water Act (33 U.S.C. 1341), an application has been submitted to the Department of the Army and the S.C. Department of Health and Environmental Control by

**Mr. Michael Greene
Dominion Energy
601 Old Taylor Road
Cayce, South Carolina 29033**

for a permit to install a 14.5 mile gas main pipeline located in

jurisdictional wetlands and tributaries

at a location east of North Old River Road and South Old River Road starting near the intersection of River Neck Road and Wross Lane in Florence County, South Carolina (Latitude: 34.0179 °N, Longitude: -79.5528 °W) and terminating near the intersection of South Old River Road and East Brazen Road in Florence County, South Carolina (Latitude: 33.9329° N, Longitude: -79.4856 °W).

In order to give all interested parties an opportunity to express their views

N O T I C E

is hereby given that written statements regarding the proposed work will be received by the **Corps** until

15 Days from the Date of this Notice,

and **SCDHEC** will receive written statements regarding the proposed work until

30 Days from the Date of this Notice

from those interested in the activity and whose interests may be affected by the proposed work.

The proposed work consists of installing a 14.5 mile, 16 inch gas main by trench and backfill, widening portions of the Right of Way (ROW) easement by 10 feet, and the installation of a permanent roadway crossing of a tributary with a culvert to retain hydrological flow. In detail, the gas main will pass through twenty-seven (27) jurisdictional wetlands and two (2x) tributaries. The project seeks to temporarily impact 7.083 acres of wetlands with temporary clearing impacts for site preparation, 8.908 acres of wetlands with temporary excavation and backfill impacts for the installation of the gas main, 0.004 acres of tributaries with permanent fill impacts for the creation of a roadway crossing with associated culvert, and 2.519 acres of wetlands with permanent clearing and conversion of land from forested wetlands to emergent wetlands. The applicant has proposed to mitigate for impacts to wetlands and/or waters of the United States by purchasing 12.7 mitigation credits from a third party mitigation bank. As stated by the applicant the following avoidance and minimization practices will be utilized: "The negligible amount of fill impacts (0.004 acres) associated with the project prevents smothering of organisms and disruption of periodic water inundation patterns. Most of the proposed impacts will be temporary. Stormwater best management practices will be implemented during construction activities to minimize sedimentation and confine suspended particulate/turbidity to a small area where settling or removal can occur. Mats will be used as applicable to prevent rutting associated with mechanized clearing. The applicant will employ appropriate maintenance and operation on equipment or machinery, including adequate training, staffing, and working procedures. The applicant will use machinery and techniques that are especially designed to reduce damage to wetlands. This may include machines with specially designed wheels or tracks, and the use of mats under heavy machines to reduce wetland surface compaction and rutting. The applicant has designed access roads and channel spanning structures using culverts, open channels, and diversions that will pass both low and high-water flows, accommodate fluctuating water levels, and maintain circulation and faunal movement where applicable. The project will avoid sites having unique habitat or other value, including habitat of threatened or endangered species." As stated by the applicant, the project purpose is "to support the development of a gas main installation referred to as River Neck to Kingsburg 16" Gas Main."

NOTE: This public notice and associated plans are available on the Corps' website at:
<http://www.sac.usace.army.mil/Missions/Regulatory/PublicNotices> .

The District Engineer has concluded that the discharges associated with this project, both direct and indirect, should be reviewed by the South Carolina Department of Health and Environmental Control in accordance with provisions of Section 401 of the Clean Water Act. As such, this notice constitutes a request, on behalf of the applicant, for certification that this project will comply with applicable effluent limitations and water quality standards. This activity may also require evaluation for compliance with the S. C. Construction in Navigable Waters Permit Program. State review, permitting and certification is conducted by the S. C. Department of Health and Environmental Control. The District Engineer will not process this application to a conclusion until such certifications are received. The applicant is hereby advised that supplemental information may be required by the State to facilitate the review.

Pursuant to the Section 7 of the Endangered Species Act of 1973 (as amended), the Corps has reviewed the project area, examined all information provided by the applicant, and the District Engineer has determined, based on the most recently available information that the project may affect Red cockaded woodpeckers (*Picoides borealis*) and may affect, but is not likely to adversely affect Canby's cowbane (*Tiedemannia canbyi*). A biological assessment (or other similar document) detailing our analysis of the potential effects of the action will be

provided to the U.S. Fish and Wildlife Service and/or the National Marine Fisheries Service.

Pursuant to Section 106 of the National Historic Preservation Act (NHPA), this public notice also constitutes a request to Indian Tribes to notify the District Engineer of any historic properties of religious and cultural significance to them that may be affected by the proposed undertaking.

In accordance with Section 106 of the NHPA, the District Engineer has consulted South Carolina ArchSite (GIS), for the presence or absence of historic properties (as defined in 36 C.F.R. 800.16)(l)(1)), and has initially determined that historic properties, are present; moreover, these historic properties may be affected by the undertaking. This public notice serves to notify the State Historic Preservation Office that the Corps plans to initiate Section 106 consultation on these historic properties. Individuals or groups who would like to be consulting parties for the purposes of the NHPA should make such a request to the Corps in writing within 30 days of this public notice. To ensure that other historic properties that the District Engineer is not aware of are not overlooked, this public notice also serves as a request to the State Historic Preservation Office and other interested parties to provide any information they may have with regard to historic properties.

The District Engineer's final eligibility and effect determination will be based upon coordination with the SHPO and/or THPO, as appropriate and required and with full consideration given to the proposed undertaking's potential direct and indirect effects on historic properties within the Corps-identified permit area.

Any person may request, in writing, within the comment period specified in this notice, that a public hearing be held to consider this application. Requests for a public hearing shall state, with particularity, the reasons for holding a public hearing.

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the activity on the public interest. The benefit which reasonably may be expected to accrue from the project must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the project will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production and, in general, the needs and welfare of the people. A permit will be granted unless the District Engineer determines that it would be contrary to the public interest. In cases of conflicting property rights, the Corps cannot undertake to adjudicate rival claims.

The Corps is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this activity. Any comments received will be considered by the Corps to determine whether to issue, modify, condition or deny a permit for this project. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the activity. **Please submit comments in writing, identifying the project of interest by public notice number, to the**

LEGEND

- The figure is a map of the study area, likely a coastal zone, showing various land uses and proposed pipeline routes. The legend identifies several key features:

 - TEMPORARY IMPACT**: Represented by light blue areas.
 - PERMANENT CLEARING IMPACT**: Represented by yellow areas.
 - TEMPORARY CLEARING IMPACT**: Represented by dark blue areas.
 - PROPOSED 16" GAS LINE (OPEN-CUT)**: Represented by a dashed red line.
 - PROPOSED 16" GAS LINE (HDD)**: Represented by a solid red line.
 - WETLAND**: Represented by green areas.
 - DOMINION ENERGY PERMANENT EASEMENT**: Represented by black lines.

A scale bar at the bottom right indicates distances up to 1000 feet. The map shows a mix of developed and undeveloped land, with proposed infrastructure lines running through the study area.
